

Isn't it great that we're working with the nearby Community Garden

Wow! Look at all these fresh produce

**NEW YORK  
RESTORATION  
PROJECT**

#### **El Barrio Community Garden**

This garden is a revitalized green space created in collaboration with the New York Restoration Project. The garden welcomes visitors with raised garden beds to showcase community efforts, and large red disks provide shaded areas. The garden also includes a rainwater harvesting system, reducing its reliance on local water supplies.

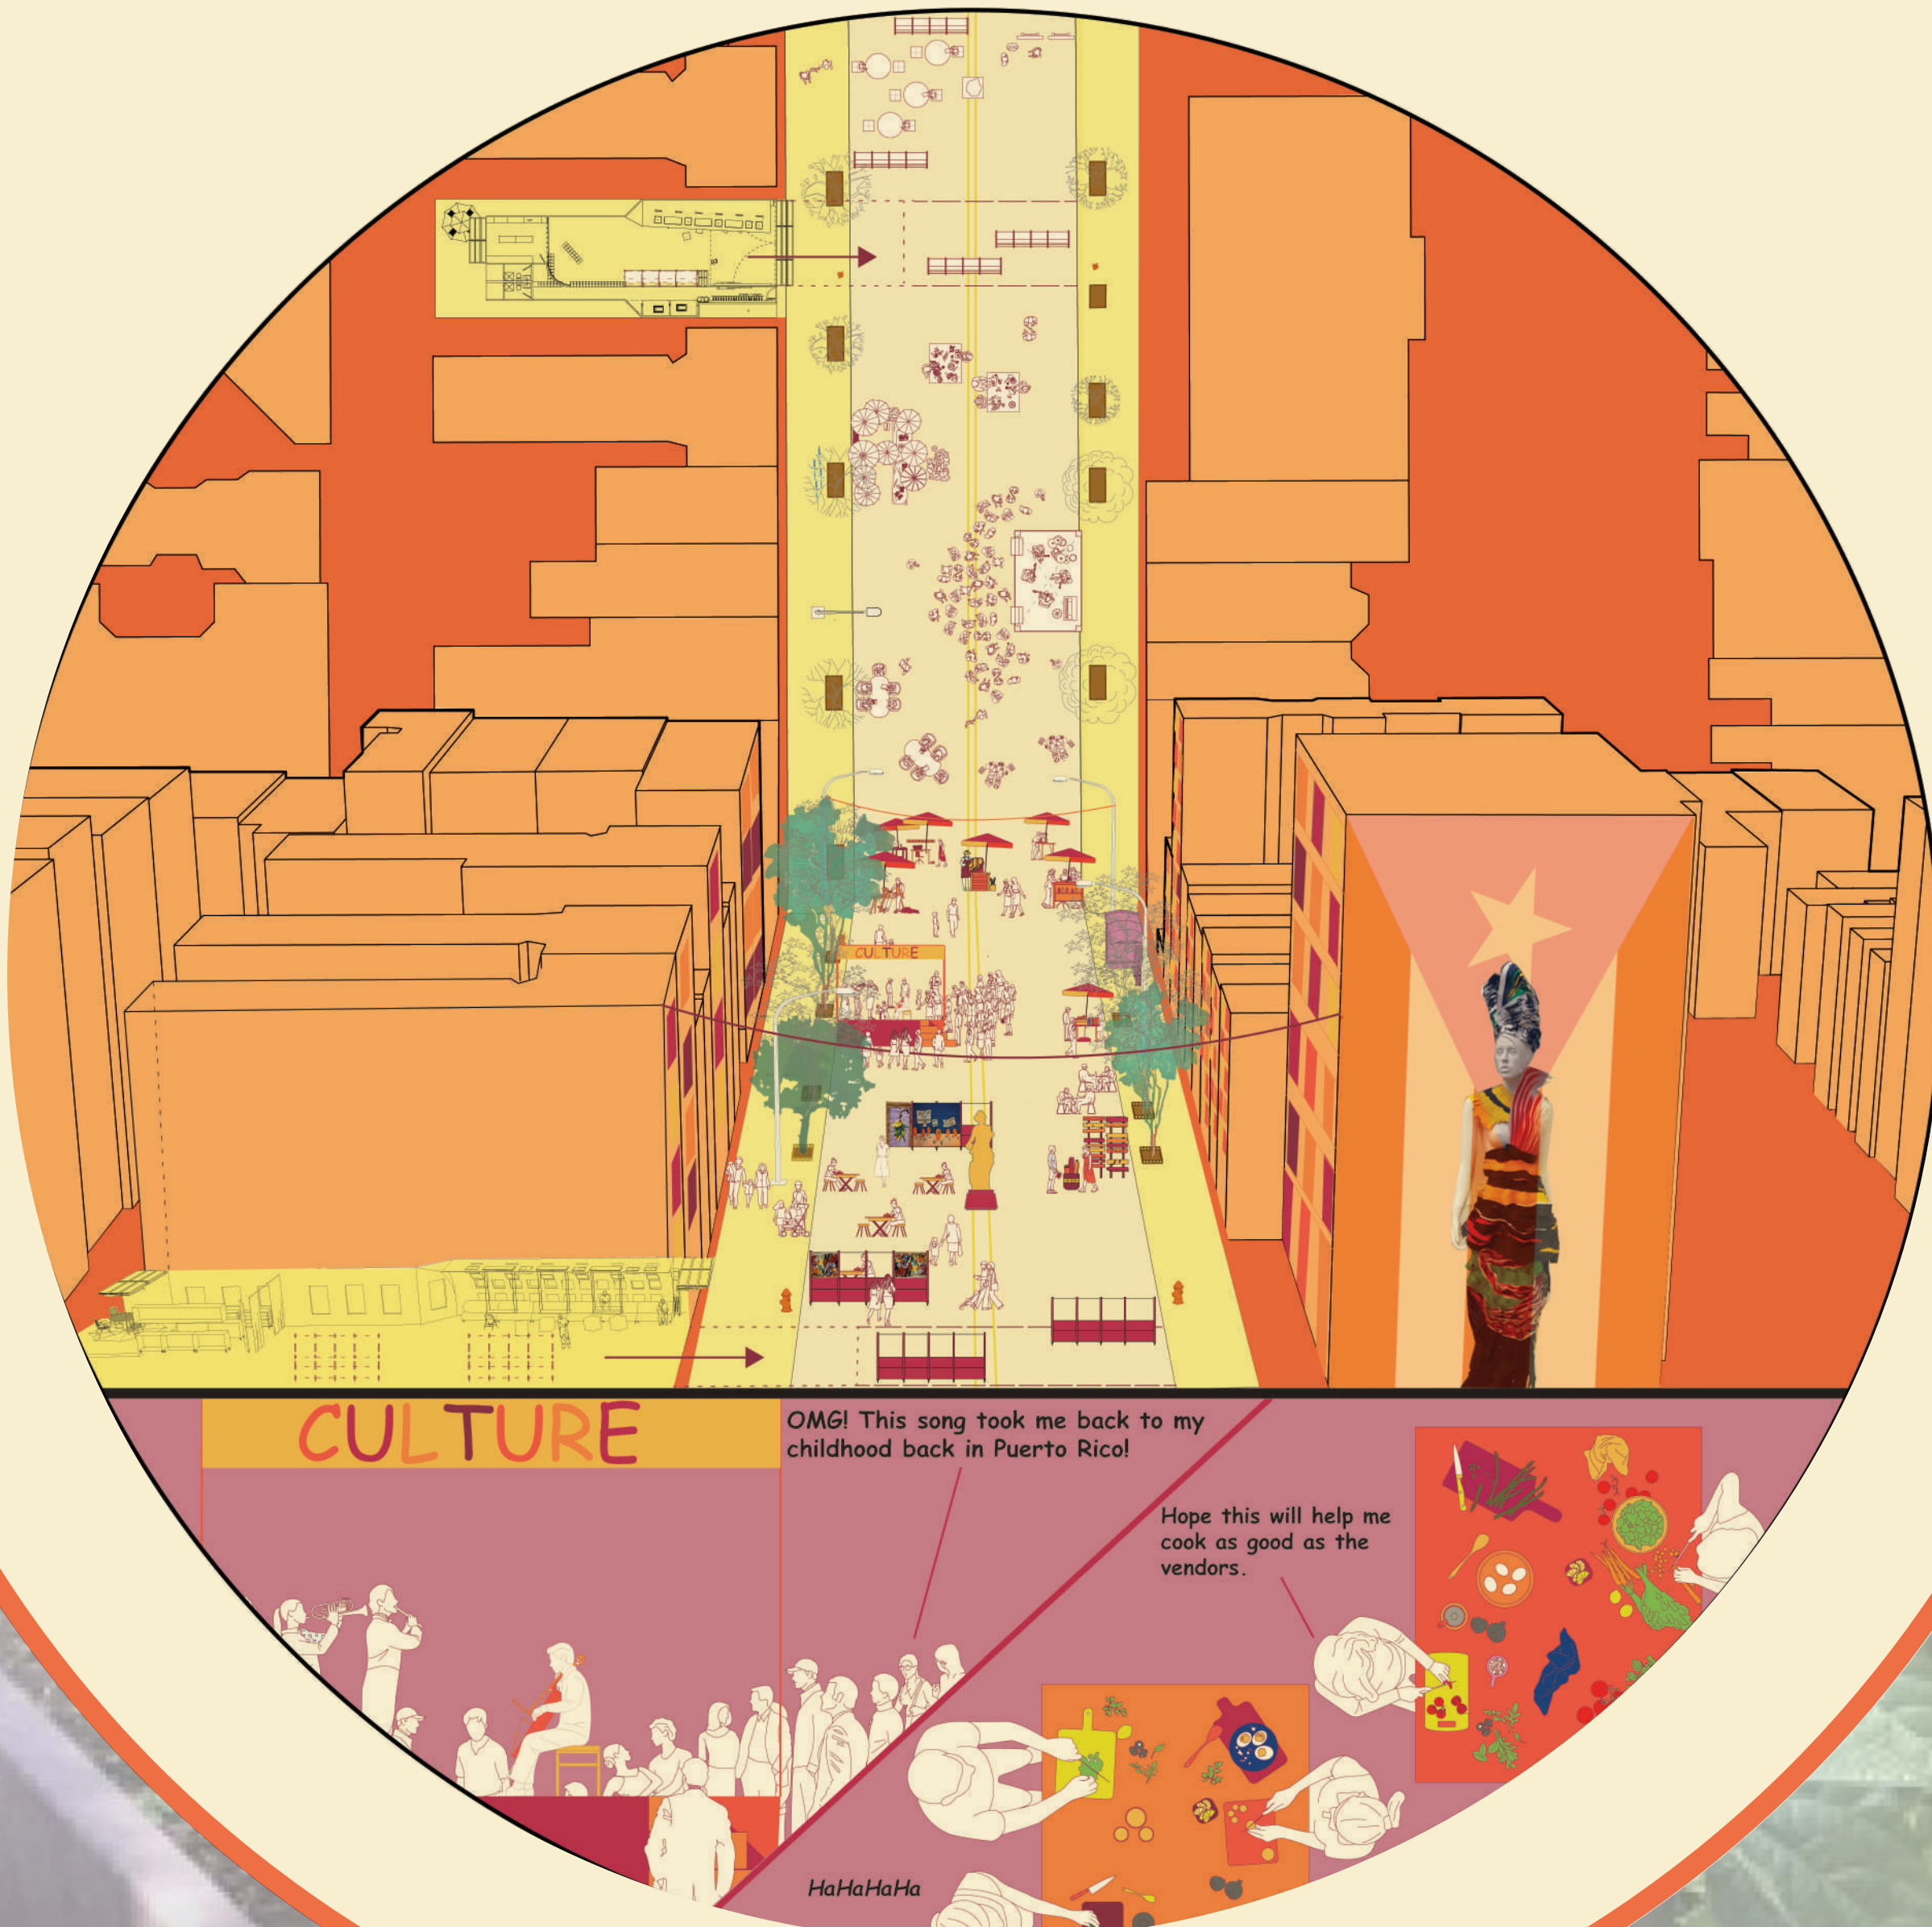

This scenario depicts a vibrant event at our site, utilizing our storefront as a central hub for community engagement. Banners and posters highlight our partnership with the El Barrio Community Garden, creating a lively and welcoming atmosphere. The collaboration provides educational opportunities for residents to learn about sustainable gardening practices and offers fresh, locally grown produce to enhance community nutrition.

#### **El Museo del Barrio**

Located in East Harlem, New York, this is a key cultural hub that celebrates Latin American and Caribbean art. Established in 1969, it showcases a diverse collection of over 8,000 objects, including pre-Columbian artifacts, traditional arts, and contemporary works. The museum also hosts educational programs and community events to celebrate and promote Latino culture and heritage.

In this scenario we are partnering with El Museo Del Barrio to educate and engage the community in Latin American and Caribbean cultures. Activities include workshops on cart repair, cooking demonstrations, and enjoying murals on movable furniture. There will be reading areas for children, vendors selling food, crafts, and art. This initiative will enhance the museum's cultural atmosphere and visibility. Partnering with local street vendors fosters community and benefits both the museum and vendors.

**CULTURE**

OMG! This song took me back to my childhood back in Puerto Rico!

Hope this will help me cook as good as the vendors.

HaHaHaHa
