Early site in 1952

Site in 2013

St. Luke's Episcopal Church is a historic landmark that has stood imposingly since 1892 on the corner of West 141st Street and Convent Avenue in Harlem.

It's known for its beautiful Gothic Revival architecture and has been a significant part of the community for over a century. The church has served as a place of worship, community gathering, and cultural events, playing a vital role in the lives of Harlem residents.

Intangible History

St. Luke's Episcopal Church has a deep connection to the Harlem community. It's not just a place of worship but also a cultural and social hub where many important life events like baptisms, weddings, and funerals have taken place.

The church has also been involved in the civil rights movement and other social justice causes, providing a space for meetings and support. This history of community involvement makes the church a symbol of unity and progress for Harlem residents.

The future of St. Luke's is uncertain since it was sold in 2015. There are plans to turn it into a school, but it's unclear how Harlem's culture will be preserved in the new design. With modernization and rising property values in Harlem, there's a risk of losing important cultural sites like St. Luke's. Losing the church would mean breaking community ties and erasing shared stories that have shaped Harlem.
