

New Building Additional Envelope

INNER ENVELOPE - PAST
The limestone brick layer symbolizes Harlem's rich history, resilience, and cultural legacy. It represents the strength of traditional craftsmanship and the faith that has long united the community. Exposed brickwork evokes durability, reflecting the church's transformation—a space that adapts to modern needs while honoring its sacred and social foundations.

OUTER ENVELOPE - PRESENT/FUTURE
Olivet's "broken" concrete layer reflects Harlem's evolution, where a resilient past shapes a visionary future. This unfinished design symbolizes growth, transformation, and the church's dual role as a sacred and communal space. It honors history while looking to the future, reflecting Harlem's journey of progress and transformation.
